

BBCC2024 - LIST OF POSTERS

- P1
Anti-cancer compound biosynthetic pathways in the marine diatom *Cylindrotheca Closterium*
Nova Yurika, Eleonora Montuori, Chiara Lauritano
- P2
Interpretable machine learning models for pathogenicity prediction
Javier Guerrero-Flores, Natàlia Padilla, Xavier de la Cruz
- P3
Assessing the impact of sailing on motor functions and quality of life in young patients with rare skeletal disorders: a quantitative approach
Davide Scognamiglio, Manila Boarini, Giuseppina Mariagrazia Farella, Giacomo Villa, Enrica Di Sipio, Giulia Rogati, Lisa Berti, Silvana Sartini, Alberto Leardini, Luca Sangiorgi
- P4
A novel tool to investigate food compounds and their effects on human health by integrating online bioinformatics resources
Nadia Sanseverino, Deborah Giordano, Angelo Facchiano
- P5
A bioinformatics strategy to characterize *Zostera marina* rhythmic genes and explore their conservation between marine and land plants
Alessia Riccardi, Luca Ambrosino, Marco Miralto, Miriam Ruocco, Marlene Jahnke, Gabriele Procaccini, Maria Luisa Chiusano, Emanuela Dattolo
- P6
Use of methylation-based machine learning algorithm to classify brain tumors not elsewhere classified (NEC)
Maria Rosaria De Filippo, Gianluca Lopez, Annamaria Morotti, Giorgia De Turris, Alessandra M. Storaci, Manuela Caroli, Claudia Fanizzi, Marco Locatelli, Stefano Ferrero, Valentina Vaira
- P7
GIMP: A Comprehensive R Package for exploring Genomic Imprinting Methylation Patterns in Imprinting Disorders
Francesco Cecere, Abu Saadat, Andrea Riccio, Claudia Angelini
- P8
Predicting medium and long-term risks in asplenic patients: a precision medicine approach
Teresa Cappuccio, Maddalena Casale, Laura Casalino, Maurizio Giordano, Marcella Vacca, Iliaria Granata
- P9
Application of Machine Learning in Predicting Alzheimer's Disease Using Dietary Data
Antonio Agliata, Francesco Bardozzo, M. Caiazzo, G. Carotenuto, G.M. Di Vincenzo, Angelo Facchiano, Antonio Pilato, Mariacarmen Sorrentino, Roberto Tagliaferri
- P10
OMICS techniques to evaluate the toxic effects of biodegradable polymers on two model crustaceans: *Idotea balthica* basteri Audouin, 1826 and *Hippolyte inermis* Leach, 1816
Amalia Amato, Roberta Esposito, Bruno Pinto, Thomas Viel, Francesca Glaviano, Mariacristina Cocca, Loredana Manfra, Giovanni Libralato, Emanuele Somma, Maurizio Lorenti, Eliahu D. Aflalo, Amir Sagi, Maria Costantini, Valerio Zupo

P11

The ongoing MAMELI study: MAPPING the Methylation of repetitive elements to track the Exposome effects on health

Tiago Nardi, Federica Rota, Chiara Favero, Simona Iodice, Luca Pandolfini, Elia Biganzoli, Valentina Bollati

P12

circQIT: circular RNA Quantification and Identification Tool

Domenico Palumbo, Francesca Calanca, Viola Melone, Luigi Palo, Alessandro Giordano, Dilia Rea, Francesca Rizzo, Giovanni Nassa, Alessandro Weisz, Roberta Tarallo

P13

Non-invasive approaches for 3D Reconstruction of Tree Root Systems in Urban Environments

Rosangela Casolare, Gabriella Sferra, Stefano Ricciardi, Rocco Oliveto, Gabriella Stefania Scippa

P14

The Probabilistic Patient Navigator: An Interpretable Approach to Healthcare Decision-Making

Sheresh Zahoor, Pietro Liò, Gaël Dias, Mohammed Hasanuzzaman

P15

Exploring biomarker dynamics in Inflamm-Aging phenomenon: A longitudinal multivariate analysis from the HEBE project

Davide Biganzoli, Simona Iodice, Federica Rota, Valentina Artusa, Lara De Luca, Claudio Fenizia, Daniela Lucini, Chiara Mandò, Francesca Bianchi, Mario Clerici, Valentina Bollati, Elia Biganzoli, HEBE Consortium

P16

A computational approach to the dissection of cardiopharyngeal mesoderm differentiation involved in congenital heart disease

Olga Lanzetta, Marchesa Bilio, Johannes Liebig, Katharina Jechow, Foo Wei Ten, Rosa Ferrentino, Iliaria Aurigemma, Elizabeth Illingworth, Christian Conrad, Sören Lukassen, Antonio Baldini, Claudia Angelini

P17

Using Machine Learning to Explore the Genetics of Tobacco Addiction: A Study of an African American Population

Ibrahima Diallo, Ines Abdeljaoued-Tej, Harouna Soumaré, Amor Mosbah, Mariem Hanachi, Oussema Souiai, Emna Harigua, Christian Happi, Alia Benkahla

P18

Optimizing dual RNA-Seq for phylogenetically similar organisms: a comparative analysis of sequential and combined mapping in host-parasitic plant interactions

Gaetano Aufiero, Carmine Fruggiero, Davide D'Angelo, Edoardo Pasolli, Nunzio D'Agostino

P19

Structural Basis of PMM1 and PMM2 Dimerization Specificity: Implications for Glycosylation Disorders

Jessica Bovenzi, Maria Monticelli, Giuseppina Andreotti, Maria Vittoria Cubellis, Bruno Hay Mele

P20

Clustering-Based Stratification of Mild Cognitive Impairment: Insights from Blood Transcriptomic Data

Laura Antonelli, Claudia Di Napoli, Lucia Maddalena, Giovanni Paragliola, Patrizia Ribino, Luca Serino, Iliaria Granata

P21

Structure-based design of peptides for biomedical applications

Eleonora Proia (1), Emanuele Savino (1), Gianmarco Pascarella (2), Andrea Ilari (3), Allegra Via (4), Veronica Morea (5), Patrizio Di Micco (6)

P22

Omics tools to isolate genes involved in sex differentiation of the shrimp *Hippolyte inermis* (Leach, 1815): a new challenging approach

Bruno Pinto, Marialuisa Lusito, Amalia Amato, Giuseppe Trotta, Roberta Esposito, Elvira Brunelli, Amir Sagi, Eliahu D. Aflalo, Takashi Gojobori, Robert Hoehndorf, Maria Costantini, Valerio Zupo

P23

The ALFI database: images and annotations for label-free time-lapse microscopy

Federica Polverino, Laura Antonelli, Alexandra Albu, Aroj Hada, Italia A. Asteriti, Francesca Degrassi, Lucia Maddalena, Mario R. Guarracino, Giulia Guarguaglini

P24

Pipeline for RNA-seq data analysis on organoids derived from celiac patients

Davide Biondi, Simone Bonora, Francesco Bardozzo, Anna Marabotti, Roberto Tagliaferri

P25

PTF-Vāc: Ab-initio discovery of plant transcription factors binding sites using explainable and generative deep co-learning encoders-decoders

Sagar Gupta, Jyoti, Umesh Bhati, Veerbhan Kesarwani, Akanksha Sharma, Ravi Shankar

P26

A Marine Automated Recognition and Identification System based on Multimodal Artificial Intelligence Methods

Simone Cioffi, Federica Ferrigno, Gennaro Mellone, Vincenzo Mariano Scarrica, Emanuel Di Nardo, Roberto Sandulli, Antonino Staiano, Angelo Ciaramella

P27

A structural bioinformatics approach to study the effects of site-specific variations in Eosinophilic Esophagitis (EoE)

Deborah Giordano, Antonio d'Acierno, Anna Marabotti, Paola Iovino, Giuseppe Iacomino, Angelo Facchiano

P28

Automated cellular imaging to investigate the role of microtubule regulators during neuronal cell differentiation over time

Ludovica Altieri, Vincenzo Costanzo, Silvia Gasparini, Cecilia Mannironi, and Patrizia Lavia

P29

Polygenic scoring methods in complex traits

Luigi Casillo, Francesca Bonometti, Mirko Treccani, Dramane Dagnogo, Giovanni Malerba

P30

Drug repurposing approach by structure-based virtual screening to identify novel putative VCP/p97 inhibitors

Carmen Maccanico, Palmina Bagnara, Elena Di Gennaro, Alfredo Budillon, Susan Costantini

P31

FACE2FACE: a simple tool for macromolecule interface analysis

Mario Incarnato, Gianmarco Pascarella, Allegra Via, Veronica Morea, Patrizio Di Micco

P32

The Role of Amino Acid Metabolism in Autosomal Dominant Polycystic Kidney Disease Progression

Gözde Ertürk Zararsız, Serra İlayda Yerlitaş, Ahu Cephe, Alparslan Demiray, Salih Güntüğ Özaytürk, Necla Kochan, Halef Okan Doğan, Gökmen Zararsız, İsmail Koçyiğit

P33

Fatty Acid Metabolism in the Progression of Autosomal Dominant Polycystic Kidney Disease

Gökmen Zararsız, Gözde Ertürk Zararsız, Serra İlayda Yerlitaş, Ahu Cephe, Alparslan Demiray, Salih Güntüğ Özaytürk, Necla Kochan, Halef Okan Doğan, İsmail Koçyiğit

P34

Machine-Learning-Based Modeling of Amino Acid Levels in Crimean-Congo Hemorrhagic Fever Patients

Ahu Cephe, Seyit Ali Büyüktuna, Serra İlayda Yerlitaş, Gözde Ertük Zararsız, Kübra Doğan, Demet Kabla, Gökhan Bağcı, Selda Özer, Cihad Baysal, Yasemin Çakır, Necla Koçhan, Halef Okan Doğan, Gökmen Zararsız
